

Mr. Cornelison's practice focuses on patent procurement, analysis, licensing and enforcement in the electrical, computer, mechanical and communication fields. He advises clients on patent, copyright, trademark, and trade secret law as they apply to various technologies, including image forming devices, electromagnetic devices, RFID, telecommunications, control systems, E-commerce, software, and medical devices. Prior to entering private practice, Mr. Cornelison was an examiner in the United States Patent and Trademark Office. From 1985 to 1995, he was a software and electrical engineer specializing in the design, integration and certification of military radar systems, and military command and control systems.
